## ABOUT ME

As a student from a scientific background with a keen interest in computer applications, I am currently pursuing my graduation in Computer Science at KIIT University. Over the past two years, I have been actively practicing graphic designing and have developed a love for designing posters, logos, and graphical illustrations.

I am constantly eager to learn new software and techniques to enhance my technical skills and strengths in design. Furthermore, I relish new and challenging projects that push me to learn and grow more in the field of design.
